Required Tools: Stapler, Scissors or Utility Knife

- Place vinyl cover over existing seat back as shown at right. Center the cushion within the vinyl form.

- Turn backrest and cover over so that the cushion is laying plastic side up and staple cover in place as shown. Tips: staple the top side of the backrest first, starting in recessed area and working out, stretch evenly to maintain alignment, visually check alignment

- Trim excess vinyl using a scissors or utility knife.

- You can enhance the appearance of the finished look of your re-upholstered seat back by taking a few extra minutes and stapling the vinyl edges down into place, as shown.
