- HDPE
- ABS

UPHOLSTERY FABRICATION

Building on 40+ years of seamless vinyl upholstery expertise

Seamless vinyl seat covers have no thread to become brittle and break and no point of entry for moisture to seep. Wurms Diversified Solutions has thermoformed seamless vinyl covers for several industries since the 1980s. Our upholstery operations have assembled pads and cushions using seamless vinyl covers since 2005. Several niche markets turn to us where exclusive items are produced as seamless vinyl covers, pads or complete cushion assemblies to OEM customer drawings including:

- Bumper pads & seating in the patient area of ambulances
- Seating on golf cars and UTVs for personal, commercial and industrial use
- Seating on recreational and sport vehicle market, ATVs and utility vehicles
- Healthcare equipment used in medical, veterinary, and dental markets for complete cushions used on examination tables, stools and chairs
- Pads for commercial shuttle buses
- Mechanics stools and creeper pads

Need the complete assembled pad or cushion? Our upholstery department is fully qualified to assemble the best looking cushions in the industry. Our wood operations fabricates any needed wood substrate, while our plastic operations fabricates any necessary back panels, seat pans and/or HDPE flip boards where applicable. For a free quote and to discuss your needs, don't hesitate to contact us today!
